Billy Gilman, God's Alive And Well

When I see the stars
Hanging in the sky
Oh
When I watch a bird
Spread it's wings and fly
And each time I hear
The wind blow through the trees
Oh
With every breath of air that I breathe
All the things I can't see
Still inside I believe

Chorus:

In a baby's laugh
In a mother's eyes
Little miracles around us everyday of our lives
The way the sun lights up the dark
The hope that I have in my heart
And as far as I can tell
God's alive and well
Yeah God's alive and well

Just like the earth
Cradles the moon
Oh
How that far away sun
Still makes the flowers bloom
And the joy only heaven
Can bring to us all
Oh
If trouble comes
I am safe in the hands
'Cause I know there's a plan
My heart understands

Chorus 1x

Call it a little bit of luck
Or just a simple twist of faith
When we get swept up in the arms
You can feel it everyday

Chorus 1x

As far as I can tell God's alive and well
