

# Billy Gilman, Southern Star

I see her climbing my fence  
She's throwing stones up at my window  
She loves the midnight hour  
She wants to play and that's all I need to know  
I opened the door to the back porch  
Barefoot on the cold floor  
Didn't know where she was coming from  
But that's what I'm goin' for

(Chorus)

And it seems like the sun never goes down  
When the daylight fades on this side of town  
And we're dancin' around  
Under the southern stars  
And it feels like there's nothin' but wide open sky  
When you're spreadin' your wings and learning to fly  
And you get so high you can't forget where you are  
I can't come down  
I've gone too far  
Wishing on a southern star

We take the long way home  
That's where you find your dreams come true  
Lying under the falling leaves  
That's when you change your point of view  
I fell in love that summer  
And I tried to tell her  
But just try to catch an eagle  
Like you could ever

(Chorus)

(Chorus Outro)

Yeah, it seems like the sun never goes down  
When the daylight fades on this side of town  
And we're dancin' around under the southern stars  
I can't come down, I've gone too far  
I'm wishin' on my southern star
