Billy Idol, Lady Do Or Die

What it takes It takes a dog to cry What it takes a boy must die What it takes sometime Before midnight What it takes It takes a life

'Cos I was o' so young Misshaped before my time Ride metallic monsters And there's mud in your eye For lady do or die

It makes a woman bleed Can't give her all her needs Close the door before you leave Can almost hear her breath It's a shame "what you've become" The things I do for love On this road tonight Looking for her candlelight For lady do or die For lady do or die

Tumbleweed, passing by Train whistle start to cry More people start to die I don't know why God knows why

I wonder what it takes To free someone I wonder what it takes Free you from your prison

Kings of the road keep travelin' on Every mile a ragged woe Kings on the road keep smiling on Play the guitar and sing the blues and cry Play the guitar and sing the blues and cry Play the guitar and sing the blues and cry

For lady do or die For lady do or die For lady do or die For lady do or die

For lady do or die Play the blues and cry For lady do or die Play the guitar For lady do or die Sing, sing the blues and cry For lady do or die...
