

Billy Ray Cyrus, How Much

One candle burns brightly
It flickers and it almost dies like me
Alone against the wind
But this moment has magic
It's keeping that flame alive
As we hold on to the night
There'll be another day, we'll have another chance
But not like this, no nothing can compare
To the way I feel right now
Do you feel the same way I do, tell me
How strong-how strong do you want it to be
How do-how do you want to hear it from me
How long-how long and baby tell me how deep
How much love do you want from me
Somebody must have scared you
Left you wounded and afraid to love again
You are just like me
'Cause nobody ever held me
So close so desperately and I
I never held anybody like you
There'll be another day, we'll have another chance
But not like this, no nothing can compare
To the way I feel right now
Do you feel the same way I do, tell me
How strong-how strong do you want it to be
How do-how do you want to hear it from me
How long-how long and baby tell me how deep
How much love do you want from me
How much love do you want from me
One tender moment is all I need
This world's gone crazy baby shelter me
You've gotta shelter me
There'll be another day, we'll have another chance
But not like this, no nothing can compare
To the way that I feel right now
Do you feel the same way I do, tell me
How strong-how strong do you want it to be
How do-how do you want to hear it from me
How long-how long and baby tell me how deep
How much love do you want from me
How strong-how strong do you want it to be
How do-how do you want to hear it from me
How long-how long and baby tell me how deep
How much love do you want from me
How much, how much
How much love do you want from me
