

Billy Ray Cyrus, I Ain't Even Left

My bags are packed this evening
You know I'll soon be leavin'
It's gonna be another long night
Mmmmm a long, long night
I know that we just said hello
Now it's time for me to go
You wouldn't want me to miss my flight
Not out of mind but out of sight
I ain't even left and it already don't feel right
How in the hell can we let love grow
When the only thing we ever know is
I'll call you or you call me
Love is blind so I can't see
The only thing I know is baby
I ain't even left
And it already don't feel right
I ain't even left and it already don't feel right
All I know is I can't control this missin' you inside
Loneliness like I've never known
'Til you walked into my life
And I ain't even left and it already don't feel right
And I ain't even left and it already don't feel right
(Instrumental Break)
I ain't even left and it already don't feel right
All I know is I can't control this missin' you inside
Loneliness like I've never known
'Til you walked into my life
And I ain't even left and it already don't feel right
And I ain't even left and it already don't feel right
