

Black, Come To Me

Am I the only one
Strung out and smiling in your shadow
When I dream it's always you
In black seams
And touching up your lipstick good
And it's alright
I'm free I can stay all night
With you
I'm hungry I can't sleep
I'd ride the breath out of an angel
No cure and no relief
Until you're here
A part of my reality
And it's all right
I say please come and stay all night
With me
With me
I maybe much that is wrong with you
Right now I want you with my heart and my sole
And I would wait but it takes so long
So long
So come to me
Come to me, come to me, come to me
My star my saving grace
You hit the stupid bit inside of me
Unsure I smile in case
I change my mind
And then I have to lie to you
That it's all right with me
I want you all night with me
With me
There maybe much that is wrong with me
I'm out size and rusted in my heart and my sole
But I here and waiting but it takes to long
Much to long
So come to me
Come to me, come to me, come to me
