

# Black Flag, Best One Yet

You say you don't like the things I've done  
You say you don't like what I've become  
When you look into the mirror, tell me what you see  
When you see yourself then you'll see me

This will be the best one yet  
This will be the best one yet  
This will be the best one yet  
This will be the best one yet

You're walking around with your eyes wide open  
And you're walking around with your mind shut tight  
When you look into the mirror, tell me what you see  
When you see yourself then you'll see me

I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be

I don't need you to tell me what I see  
Take a look around, take a look around, take a look around  
When you come on home tell me what you've seen

I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be

You say you don't like the things I've done  
You say you don't like what I've become  
When you look into the mirror, tell me what you see  
When you see yourself then you'll see me

I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be  
I don't need you to tell me what to be
