

Black Lab, Circus Lights

well, come on and spend the night
under the circus lights
wanna see you high above the crowd.
you know i've swallowed fire
and i've fallen off the wire
a million times before
are you're asking me
to show you more love
more life, more heat
are you asking me
take you, hold you,
show you more
more life, more heat
if you're asking me
i'll be there
when these circus lights go out

i'll be the tattooed man
you can be the acrobat
i'll try and catch you when you fall
and we'll be together then
like a pair of saimese twins
entwined against the ground
tell me what more could you ask for now?

more life more heat
are you asking me
take you, hold you
show you more
more life, more heat
If you're asking me, I'll be there,
when these circus lights go out.

when these circus lights go out

when these circus lights go out

I wake up to the sounds of bells
a thousand girls in wedding veils
but all I want is you, do you believe me?
cause the one game that I never play,
the one mistake I never made
was to come right out and ask you if you need me
do you need me now?
need me now?
need me now?

cause I need more
more life, more heat
cause I'm asking please
take me, hold me, show more love,
more life, more heat
If you're asking me, i'll be there,
when these circus lights go out

when these circus lights go out
