

# Blackalicious, Chemical Calisthenics

[Gift of Gab]  
I can do anything

Neutron, proton, mass effect, lyrical oxidation, yo irrelevant  
Mass spectrograph, your electron volt, atomic energy erupting  
As I get all open on betatron, gamma rays thermo cracking  
Cyclotron and any and every mic  
You're on trans iridium, if you're always uranium  
Molecules, spontaneous combustion, pow

Law of de-fi-nite pro-por-tion, gain-ing weight  
I'm every element of brown

Lead, gold, tin, iron, platinum, zinc, when I rap you think  
Iodine nitrate activate  
Red geranium, the only difference is I transmit sound  
Balance was unbalanced then you add a little talent and

Careful, careful with those ingredients  
They could explode and blow up if you drop then  
And they hit the ground

Let it flow, yo, just let it go, get back

C-O-H-O-2 wine water solution of calcium hydroxide  
Slobbin it, C-A-O lime will make bleach powder  
Galvanic metal beats stomp out louder  
Dried ice, C-0 squared refrigerant  
N-O-2 makes you laugh, it's laughing gas used by the dentists  
I nearly added acid glue, I'm like oil of a toil, the king of chemicals  
And the G heat gas waved all your mats  
Chemical change, ice point, melt all your raps  
Atomic weight, hold shocks, when you call  
Refillable gas keep going way beyond  
Biotch I'm only ill with buzzin, feel the ambiance  
A diabetic process outta calm your ass  
After I warm your ass, I'll give sodium silicate N-O-2-S-1-O-3, a water glass  
Borax flexure full of brimstone sulfur  
Borax acid, hip-hop preserver  
C-O-2 could never put away the fire  
Style aroma is scientific; the lyrical fuse would be connected  
To teach you chemical calisthenics

The Theory is that all matter is composed of at least three fundamental particles  
Protons, electrons, neutrons, Protons charge is positive  
By now you've guessed electrons are probably negatively charged  
Neutrons don't follow either, neutral, in the middle, only no apologies  
Centered, unmoved by yin and yang ideology  
Neutron, bomb songs, electron fury  
Cosmic musical radio-activity  
Different points in joints within infinity  
Oxygen and hydrogen alive within all types of energy  
Within all types of energy  
Within all types of energy  
Within all types of energy  
Within all types of energy, inside a world, inside a world  
Inside a universe, inside of me existing although I can't see it

Hydrocarbon, nitrogen cycle, ionization  
Heavier than electric motor metals that weigh over a ton  
This has been a chemist, Blackalicious creation  
Clean out your desk, put your papers away cause class in almost done

This is chemistry plus calisthenics

I'm calcium plus potassium, magnesium, newspaper of sodium, sulfate  
Your solvent, chloroform, remedy from the norm  
glycerin, purest form Titanium  
there is no way out, when this newfy is out  
of all arms vibration, forming in a nigga  
some bleachin' to teach ya religious is equal to pieces of meteor  
Eager to be here or is it, can see here I know all of all  
I'ma pickin' up pretty little Cindy  
I'm more, I'm thinkin of more,  
I'm cookin a potion!
