

Blackened, Bear Me Dragon

Lord of dragons hear my call
Slept a thousand years so deep
Now we call to thee again
To raise your brothers from their sleep

Once again we need your help
Cause there's a battle close at hand
Together we will ride my friend
And drive them from these sacred land

The Dark Queen's dragons have arised
From children's books, from old-man tale
But Paladin is by my side
So I know we'll never fail

A lance of steel bears all our hope
The legacy it holds within
Glorious is our death
The final chapter may begin

Fight my brothers
Paladin will be our guide
We will die with honour and pride
Fight my brothers
A thousand dragons side by side
Your breath shall burn
A beacon in the night

Refrain:
Bear Me Dragon
Wings of fire in the sky
Faster than the falcon
Take me high so high
Bear Me Dragon
To the battle in the sky
We fight for glory
'till we die
