

# Blackhawk, Days Of America

Hey.

The furnace burns in steel town  
Big business came and tried to shut 'em down  
Workers got together and they bought that mill  
They're making steel in Pittsburgh still

The family farm down in Indiana  
The bank's foreclosin' just because they can  
The farmer can't do nothin' 'bout another drought  
But John, Waylon & Willie came and helped 'em out

These are the days of America  
Brother to brother, hand in hand  
These are the days of America  
Walking together through the promise land

The wheels in Detroit keep on turnin'  
A blue collar lesson there for the learnin'  
The throttle drives you anywhere no matter how far  
Just never give up on who you are

These are the days of America  
Brother to brother, hand in hand  
These are the days of America  
Walking together through the promise land

--- Instrumental ---

Right down the middle of America  
Where her heart beats strong and true  
Look up and just open your eyes  
The flag still waves and the eagle still flies

These are the days of America  
Brother to brother, hand in hand  
These are the days of America  
Walking together through the promise land

These are the days  
These are the days of America  
These are the days  
These are the days of America...
