

Blackhawk, I Need You All The Time

I need a car when I'm driving
A plane when I'm flying
A call takes a quarter and dime
I need a radio playing
When there's nothing worth saying
And help when I'm falling behind
Extra rest on occasion Holiday or vacation
But I need you all the time

Every beat of my heart
Every thought in my head
Points straight to you
Underlined in red
Every move I make
Every minute of mine
I need you all the time

I need boots when I'm walking
Southern drawl when I'm talking
And run when I want to unwind
A little cash when I'm going
Some freedom for growing
Some preaching to keep me in line
They can build it or dream it
I could take it or leave it
But I need you all the time

Every beat of my heart
Every thought in my head
Points straight to you
Underlined in red
Every move I make
Every minute of mine
I need you all the time

--- Instrumental ---

Every beat of my heart
Every thought in my head
Points straight to you
Underlined in red
Every move I make
Every minute of mine
I need you all the time

I need a car when I'm driving
A plane when I'm flying
A map when there's a city to find
I need you all the time
Yeah, I need you all the time
I need you all the time...
