

Blackmail, (Feel It) Day By Day

cut off your head
a crash to believe
you roll down a fiction
to scratch on the sleeve
you wanna get closer
you wanna get all you need
but you gotta be patient
to stop the disease

you have to move along
with the headlights

kick off the silence
and stick to your friends
stop the invasion
but don't stop to pretend
now you wanna get angry
how can you stop the heat?
well, it's gonna get better
and soon you will be relieved

you feel it day by day
just let it go away
you suffer heavy loss
can't cross it with a cross
but you'll get through it anyway

you have to move along
with the headlights

scraps in your mind
i know you want more
you're gonna be released
with my head on your door

you have to move along
with the headlights
