Blackmore's Night, All Because Of You

All because of you

Is this happening? Is this fantasy? Never did I believe
There could be such happiness
Feels like nothing on earth
Started with one little kiss...
I could stay in this moment forever I could reach every star in the sky I could lose myself when I look Into your eyes...

Is this happening? Is this fantasy?

All my dreams coming true...
...all because of you
I can't believe its true...
...all because of you...

You are everything I Wanted for so many years... Goodbye long, lonely nights Sadness and thousands of tears

I could stay in this moment forever I could reach every star in the sky I could lose myself when I look Into your eyes...

Is this happening? Is this fantasy?

All my dreams coming true...
...all because of you
I can't believe its true...
...all because of you...

Is this happening? Is this fantasy?

All my dreams coming true...
...all because of you
I can't believe its true...
...all because of you...
...all because of you...
