

Blackmore's Night, Christmas Eve

Say goodbye to November
She must be on her way
The cold winds of December
Look like they're here to stay
Me, I'll just count the snowflakes
As they start to fall
Getting lost in the beauty
The magic of it all

And our eyes filled with wonder,
As the reindeer take to flight

*Its Christmas eve
Bells will ring
Through the town we gather to sing
Christmas eve
Has begun
Peace and love to everyone

Light the festive candles
They'll chase the shadows away
Gathering round the yule log
With handfuls of holly
Winter winds will whisper
Through the shivering pines
Never have the stars looked brighter than tonight
