

Blackmore's Night, Locked Within The Crystal Ball

Here in the spotlight this moment is ours
No one can stop us, we're one with the stars

I feel the waves begin to rise
Far across the ocean deep within your eyes
Silently watching as they fall
I can see the future locked within the crystal ball

Strike up the lightening, hear my prayer
Feel the light electric dancing through the air
Here by the ancient castle wall
Can you see the future locked within the crystal ball

Here in the spotlight this moment is ours
No one can stop us, we're one with the stars

Quiet by nature, standing tall
Old stone circles, they have seen it all
Caught like a ghost in yesterday, shadows down the hall
Are locked within the crystal ball

Fire and water, earth and sky
Mysteries surround us, legends never die
They live for the moment, lost in time, I can hear them call
They're locked within the crystal ball

I feel the waves begin to rise
Far across the ocean deep within your eyes
Silently watching as they fall
I can see the future locked within the crystal ball
