

Blake Babies, Picture Perfect

She's the window to my soul to let in the sun
Like two pieces of a whole could truly become one
She's my favorite shade of blue
The verdant glow of spring
Every color, every hue
Could be my everything
Can you picture perfect?
Can you make the moment stay?
Take a picture, perfect
I know it can always be like this day
She's the moment in the song that shivers down my spine
When it lasts the whole night long it's easy to define
Can you picture perfect?
Can you make the moment stay?
Take a picture, perfect
I know it can always be like this day
