

Bleach, Number One

If you wanna see some action
Gotta be the centre of attraction
Make sure that they got their eyes on you, like the face that you see on every magazine
Be the focus of attention
Be the name that every one must mention
Come out from the shadows, it's your time, cos tonight is the night for everyone to see
Its natural
You know that this is where you gotta be, it must be your destiny
Sensational
And you believe that, this is what you've waited for and it's you that they all adore, so baby
Now you feel like number one
Shining bright for everyone
Living out your fantasy, the
Brightest star for all to see
Now you feel like number one
Shining bright for everyone
Living out your fantasy, you're the
Brightest star there's ever been
Feel the heat that's all around you
Flashing lights and ecstasy surround you
Everybody wants a piece of you; you're the queen of the scene, living in a dream
Its natural
You know that this is where you gotta be, it must be your destiny
Sensational
And you believe that, this is what you've waited for and it's you that they all adore
Now you feel like number one
Shining bright for everyone
Living out your fantasy, the
Brightest star for all to see
This is what you've waited for and it's you that they all adore
Now you feel like number one
Shining bright for everyone
Living out your fantasy, the
Brightest star for all to see
Now you feel like number one
Shining bright for everyone
Living out your fantasy, you're the
Brightest star there's ever been
