

Bleed The Dream, Emotion Regression

Everytime I bite my lip
I take another zip of your lies
So don't act like you're surprised
That I can't force myself to swallow my pride

You take this piece of me
Surrender awaaay
My wounds run deeper than the ocean
They just don't need me anymore
They just don't hear me anymore
I'm having trouble with emotion
They just don't hear me anymore x 4

Lets deconstruct this place
I'll rip every smile from every face
All your insecurities
I can make you feel like such a disgrace

You take this piece of me
Surrender awaaay
My wounds run deeper than the ocean
They just don't hear me anymore x 2
I'm having trouble with emotion
They just don't hear me anymore x 3

My voice just fades in the breeze
My voice comes back inside disease!?!?
My voice comes back to hunt you
My voice just fades in the breeze
My voice comes back inside disease!?!?
My voice comes back to hunt you

I know there's so much more to say
My wounds run deeper than the ocean
They just don't hear me anymore x 2
I'm having trouble with emotion
They just don't hear me anymore x 3
