

Bless The Fall, Times Like These

You make me whole
And I want to thank you for this
And I wanna thank you for this chance to be angels
You push me to strive harder, when I'm unable
And I want you said, I need this
And I want, you said, don't leave this
Now's our time we're gonna make things right
Pull through tonight
Now's our time we're gonna make things right
Pull through tonight
I remember when we were younger
We had nothing but strived for something
And I remember when we were younger
We had nothing but strived for something
And I wanna thank you for this chance to be angels
And I wanna thank you for this chance to be angels
And I want, I want, and I wanna thank you for this
And I want, I want, and I wanna thank you for this
Thank you for, for everything,
We had nothing, strived for something
I remember when we were young, we had nothing and strived for something
And now I want to know like fire, like fire
Come and drown with me like the fire
Come and light the fire
Come and light the fire
Come and light the fire
Come and light the flames
