

Blink The Star, The Star Behind The Star

On a star with my new family
More than silence, we don't even speak
No one could dissuade me, now I'm home
Mother loves me, but I've got new wings now

And I don't miss all of you suffering children when
I'm in the star behind the star, it's just beginning
Your world's abstract, we don't backtrack here
History is just a nursery
