

# Blink The Star, The Star Behind The Star

On a star with my new family  
More than silence, we don't even speak  
No one could dissuade me, now I'm home  
Mother loves me, but I've got new wings now

And I don't miss all of you suffering children when  
I'm in the star behind the star, it's just beginning  
Your world's abstract, we don't backtrack here  
History is just a nursery
