

Bliss 66, Live

Got my feet on the ground
Ain't it funny that your're not around
Got my head in the clouds
I can feel it, I'm coming down
I remember the way we were
I remember every word
When I think about what might've been
I can see what I'm livin' in

Chorus:

Would it be alright if I could live again
Would you even care if I said it's over
Would it be alright if I could live again
Live again

Out every night
Never see the light
Were you hangin in
Were you giving in
I remember the way you cry
I remember every lie
When I think about what might've been
I can see what I'm livin' in

Chorus

I remember the way we were
I remember every word
When I think about what might've been
I can see what I'm livin' in
I remember the way you cry
I remember all your lies
When I think about what might've been
I can see what I'm livin' in

Chorus (2x)
