

# Bloodflowerz, Tears Of The Night

they turn up at night, come from inside, avoid the light  
just a nightmare you said, this is no dream, no i'm not mad  
all i had known like in this song a lonely tone  
sing sweet lullabies, to me it sounds like childish cries  
cold breath in my neck, shadows creep behind my back

they breathe with our mouth  
they speak with our tongue  
they smell all my greed and undone need  
they hate with our hate  
they love with our love  
they see with our eyes what we don't see

taste the tears of the night, can't run away and we can't hide  
just fragments remain, my face had changed, i'm not the same  
a cold hand touched my core, the same hand like the night before

they live on our pain  
they feed on our dreams  
hell is a sad place in our souls  
they need all our fears  
they drink all our tears  
hell is a dark place in our souls  
awake unknown greed, they are evil seed,  
they come with the flood, they're creatures of god  
they smile in our face with a nasty grimace  
the faces of pain

[chorus:]  
misery - the flood comes rushing over me  
a tragedy - my heart is crushed a weeping sea

through eyes of tears  
i face my fears  
and i face my pain  
through the nightly rain

[chorus:]  
misery - the flood comes rushing over me  
a tragedy - my heart is crushed a weeping sea

they kiss with my lips, they speak with my tongue, they hate with my hate,  
they love with my love,  
they live on my pain, they feed on my dreams, they need all my fears,  
they drink all my tears

the voices of the dead are whispering in my head  
some cold breath in my neck, shadows creep behind my back  
they turn up at night, come from inside, avoid the light
