

# Bloodgood, Heaven On Earth

The light in your eyes and the touch of your hands  
The warmth of that smile when you look at me  
The way that you move around and through my life  
I know it's the way that it's meant to be

I know you see me when I'm standing in the dark  
You can't help cryin' out for every broken heart  
Cause you're heaven, heaven on earth

You are my desire, you are my fuel and fire  
I trust in you for everything I need  
The way that you move around and through my life  
You come alive with every line I read

You are my desire, you are my fuel and fire  
I trust in you for everything I need  
The way that you move around and through my life  
You come alive with every line I read

Heaven on earth... heaven... heaven... heaven...  
Heaven on earth
