

# bloodsimple, Leaving Song

Sit there all in all  
Waiting on the phone  
Push my body to the floor still you never call  
She's still with me kiss still kills me  
Can't feel guilty it's just a memory

All the things you put me through  
All the hopeless nights I tried to make it right for you  
Show me how it is to lose and who the hell are you  
To drag me down with you

Flowers that I bought are now dead and gone  
Love that was before is gone evermore  
All my hurting, all my yearning, all that burning  
Can't you see that it is me. my beautiful

All the things you put me through  
All the hopeless nights I tried to make it right for you  
Show me how it is to lose and who the hell are you  
To drag me down with you

Every time I looked in your eyes  
Crucified again  
Every time you sold me your lies  
It was justified in the end  
Just like some face lost on a runaway train  
Pass my bye and wave goodbye

All the things you put me through  
All the hopeless nights I tried to make it right for you  
Show me how it is to lose and who the hell are you  
To drag me down with you
