

Blue October, Where I Stand

Do you remember what you said to me
Of all the people I could put my faith in
Do you remember what it meant to me
Of all the people I could waste my days with

Sometimes, I get as low as it goes
Other times I just miss you
Sometimes, I kinda like it on my own
Other times I just stumble through

When you make me out to be like a fool
I want to know where I stand with you
When you make me out to be like a fool
I want to know where I stand with you, stand with you

Do you remember how its meant to be
Of all the times I could not forsake you
Do you remember what you took from me
I cant believe that I could so mistake you

Sometimes, I get as low as it goes
Other times I just miss you
Sometimes, I kinda like it on my own
Other times I just stumble through

When you make me out to be like a fool
I want to know where I stand with you
When you make me out to be like a fool
I want to know where I stand with you, stand with you

When you're in the darkest night and I wonder where you've been
When you're in the morning light and I wonder who you've seen

When you make me out to be like a fool
I want to know where I stand with you
When you make me out to be like a fool
I want to know where I stand with you, stand with you
