## Blue Rodeo, Shed My Skin

You've got troubles on your mind Keeps you away from me There's no sense in denying And I've cursed myself for the longest time And now I find I just don't mind

Leave your coat beside the door Come and lay here On this blanket on the floor And we'll throw our candles In the flames tonight Set it right try to set it right

(chorus)

When all our tears coming down are gone And I shed my skin before this evening's done If we never get the chance To come back here again I'll understand you know I'll understand You know I'll understand

All the spirits of the night Watch us sleeping here Beside the firelight And I'll hold my tongue Till this moment's gone Kiss the dawn Stay to kiss the dawn

(chorus)
