

Bob Catley, Gonna Live Forever

Going to live forever
Going to live our lives in just one day
Going to make it with you
Going to live forever

Don't look for excuses, ain't none around
Don't look for reasons, there's no reasons to be found
It's all or nothing but I ain't going to make you stay
Don't lose this feeling, don't make it go away

Like sand through my fingers
Every second slips away
It's us, together
Going to live our lives in a day

Going to live forever
Going to live our lives in just one day
Going to make it with you
Going to live forever

No more to tell you, ain't that enough
Don't make no promises, just want to be making love
Can't stop this feeling, ain't going to try
Just take my hand and baby, we're going to fly

Ain't complicated
Don't throw it all away
It's now or never
Going to live our lives in a day

Going to live forever
Going to live our lives in just one day
Going to make it with you
Going to live forever

Going to live forever
Going to live our lives in just one day
Going to make it with you
Going to live forever
Going to live our lives in a day

With every second lost
We're running out of time
Just take my hand
We're going to leave this world behind

Going to live forever
Going to live our lives in just one day
Going to make it with you
Going to live forever

Going to live our lives in just one day
Going to make it with you
Going to live forever
Going to live our lives in a day
