

# Bob Catley, The Fire Within Me

Is this just a dream?  
When your eyes met mine  
They touched me deep inside  
Now I'm by your side  
In the heat of the night  
Your soft caress, a moment lost in time  
A love sublime

Feeling your touch and your kisses refrain  
Knowing that you are the one  
All through the night, hold you close in my arms  
Till dawn brings the light of the sun

Are you just a dream?  
If I open up my eyes will you be there  
I don't think I dare  
With a gentle kiss  
I'm right back by your side and you're still there  
The answer to my prayer

Feeling your touch and your kisses refrain  
Knowing that you are the one  
All through the night, hold you close in my arms  
Till dawn brings the light of the sun

You're the fire within me  
The burning heart that helps me find my soul  
You're the light within me  
It's the light within me

You changed all of my world  
Do you feel the same for me as I to you?  
Got to hear the truth  
Let's hold on to  
All that we have now our dreams come true  
My dream was you

Feeling your touch and your kisses refrain  
Knowing that you are the one  
All through the night, hold you close in my arms  
Till dawn brings the light of the sun

You're the fire within me  
The burning heart that helps me find my soul  
You're the light within me  
It's the light within me

You're the fire within me  
The burning heart that helps me find my soul  
You're the light within me  
You're the one, the half that made me whole  
You are the fire within me  
The burning heart that helps me find my soul
