

Bodyjar, Home

You find where your going you work out what's wrong
And you sit down and look at your options you look at them
Find a place to go
Find the place where you know
And you will find where your life is at
You sat down
You worked out your place and your options
Your life is spread out before us
Work on your own independence
And you will find your place before me In my home
In my home before me
Take the opportunity
Some day you'll find just what you see
Don't let it go
Don't let your life go before your on your own
Without independence
And you will find your place before me
Get independent Make your life rearrange
You will find that it is changing
Make the most in every day
Work from the start
Watch it slowly come together
You'll never fall apart
You will make it come together
