

BOKKA, Apocalypse Afterparty (feat. Ania Leon)

Like a rubber ball I'm bouncing
There's a giant hole growing in my heart
New reality, it's just too much
Watching news makes me want to die
I've been anxious for so long
I can't remember what it's like when I'm not
Would you mind if we went out?
I need to decompress now

I've been alone
For too long
In the dark
Calling out
Now you know
I can fall really low
Show me the way
And I will follow

All around me, high pressure
Almost like the air's pushing at my skin
Can you feel it? The trembling
The electromagnetic field
Something's coming, it's not good
Almost like the world is about to end
Please take me anywhere
I need to rise above it

I've been alone
For too long
In the dark
Calling out
Now you know
I can fall really low
Show me the way
And I will follow
