

Bon Jovi, Secret Dreams

Riding high, then shot down
I load my guns to fire another round
I look deep into your eyes
And can't run there's nowhere left to hide
Don't stop, no it's much too late
When the night comes I can't wait
Oh I live, love to lose control
It makes me crazy I want to let you know

Chorus:

Oh, no, I don't want to fall
Oh, oh, can't you hear me calling
All night long in my secret dreams
You tell me I'm the one
When I'm next to you -- next to you.
All I want in my secret dreams
Is you here with me.
I got to get to you, get to you, get to you.

There's a thrill, in the chase
We won't lose when we meet face to face.
Love, games a means without an end.
I go down but I'll be back again
Through the night with no retreat
When you're with me in my sleep.

Chorus

I can see you
I feel you every night
I need you
But I'm only dreaming
All night long in my secret dreams
You tell me I'm the one
When I'm next to you -- next to you.
All I want in my secret dreams
Is you here with me.
