

# Bonfire, Fight For Love

I remember the winters ... when time it just stood still  
Making love by the fireside, God it felt so real  
And I still feel it burning ... when I look into your eyes  
Time was all we had to waste and I never wondered why

I remember the summers ... and the never-ending nights, yeah  
We drove around forever and ever knowing it was right  
But sometimes we could see ... into the eye of the hurricane  
It's love and pain, it's one and the same

Every single breath we took was full of emotion  
No matter what they say, we'll never walk away

Chorus:

For love, we'll always fight for love  
No you'll never have to cry, no I'll never say goodbye  
For love, we'll always fight for our love  
Like a light into the darkness...  
I will show you, I will show you how

I remember the springtime, we were kids and playing love  
Growing older and so much bolder, we couldn't get enough  
We always took for granted ... that everything would turn out right  
But dreams were not enough this time, this time we had to fight, yeah

Every single little time we kissed was more than a promise...  
That we'll take each other's hand ... and we'll make the final stand

Chorus

How to find the way, oh oh  
We're fighting, fighting for love

For love, we'll always fight for love, baby  
No you'll never have to cry - you'll never have to cry  
No I'll never say goodbye  
For love, we'll always fight for our love  
Like a light into the darkness...  
I will show you, I will show you my love  
We'll always fight for love  
No you'll never have to cry, no I'll never say goodbye  
For love, we'll always fight for our love - we'll stay together  
Like a light into the darkness...  
I will show you, I will show you how

Fight for our love  
Ooh oh oh, baby  
Fight for our love
