

Bonfire, Good Or Bad

Walkin' down those empty streets
feeling tired of playin' the game
You're captured in a town that doesn't sleep

You wanna run away from your life
but you gotta face the truth
your conscience gives you the pain you feel at night

You're lookin' out for a new horizon
While you still take the money and run
but you know there ain't compromisin'
when you play with a gun

CHORUS

Good or bad
get it on your mind again
Good or bad
never let it end
It's good or bad

Is it right or is it wrong
yet it's hard for you to tell
you try to escape the jungle out on the street

Much too long you've been on the run
oh how you long to draw a line
you can't rely on friends, you're on your own

It's the struggle of survival
what you're facing everyday
sometimes even suicidal
When you're loosing your way

CHORUS
