

# Bono&The Edge (Spider-Man Turn Off the Dark),

'Cause we can be what we wanna be  
And we need to be what we gotta be  
That's what we oughta be in the DIY world  
'Cause we can be what we wanna be (Tomorrow belongs to the brave)  
And we need to be what we gotta be (Not the slave, but the brave)  
Do it yourself, do it yourself, DIY world  
Gamma rays, tidal waves, influenza - there's so many ways  
The human race can take a hit  
We're gonna sink but you can swim  
If you don't mind a little change of skin  
Designer genes are a better fit  
'Cause we can be what we wanna be  
And we need to be what we gotta be  
That's what we oughta be in the DIY world  
'Cause we can be what we wanna be (Tomorrow belongs to the brave)  
And we need to be what we gotta be (Not the slave, but the brave)  
Do it yourself, do it yourself, DIY world  
Rising seas? No more trees?  
Then be a freakin' fleet of killer bees!  
We're masters of creation  
DNA is the way, now that evolution's had its day  
The intelligent design solution  
And we, we could live for a thousand years  
'Cause we can be what we wanna be  
And we need to be what we gotta be  
That's what we oughta be in the DIY world  
'Cause we can be what we wanna be (Do it to yourself)  
And we need to be what we gotta be (To yourself, do it to yourself)  
That's what we oughta be in the DIY world (Do it to yourself, to yourself, do it to yourself)  
'Cause we can be what we wanna be (Tomorrow belongs to the brave, not the slave)  
And we need to be what we gotta be (But the brave)  
Do it yourself, do it yourself, DIY world  
Imagine! We could produce super-strength electric reflexes  
Powers once reserved for the ancient gods are now within our grasp!  
And we, we could live (we could live) for a thousand years
