

# Booker T & The MG's, Green Onions

All right people. the rest of the hard working all star blues brothers are gonna be out here in a minute. E you're hearing. this is of course the green onions tune. it was a very big hit in the early sixties in the E united states of america. you know, people, I believe that this tune can be acquainted with the green

Now you go to germany, you've got your bach, your beethoven, your brahms... here in america you have Beethoven. Ple. another example of the great contributions in music and culture that this country has made around the world.

You see backs turned on this country. well people, I'm gonna tell you something, this continent, north America, I've got something to say to the state department. I say take that archaic monroe doctrine, and throw it out. Home for the next ten years people! right here in north america and enjoy the music and culture that this country has to offer.

I'm just talking about the music, people, and what it does to me. and that is, as you look around the world, you see that America is doing flips and twists just to get into a genuine pair of american blue jeans! and to hear this music.
