Booth And The Bad Angel, Heart

And when you took that stand I was so proud of you And now I'm not so sure You should have let them through

And when the curtain fell I saw you standing there Just looking so alive And then you started to fly

Heart, I'm so eager to please Heart, let me dance my disease Heart, I just long to be free To be healed

And so they ran to you They tried to hold you down But you just slipped your skin And let the whole world in

Heart, I'm so eager to please Heart, let me dance my disease Heart, I just long to be free To be healed

I've been looking for meaning Been afraid of these feelings Got stuck in my mind Cut myself into pieces Now I'm coming home in pieces Coming home in pieces Coming home

Heart, I'm so eager to please
Heart, let me dance my disease
Heart, I just long to be free
Heart, I just long to be healed
Heart, I don't know what I need
Heart, let me dance my disease
Heart, I'm just longing to heal
Heart, come on ride the medicine wheel
