

Brad, Never Let Each Other Down

If there's anything I could say, if there's anyway I could prove
That I would never try to do those bad things to you
To make you feel like you do

chorus:

All we were saying was let's be friends and never let each other down
All we were saying was let's pretend that we never let each other down
Words can be weapons, my friend

You never know until the end

Why did I say a word? Why did I have to lie?

chorus:

All we were saying was let's be friends and never let each other down
All we were saying was let's pretend that we never let each other down
We never let each other down

No one ever knows in the blink of an eye when the leaves tell a lie to the fall
Each has its own way of looking at love in the stars you will find after all

chorus:

All we were saying was let's be friends and never let each other down
All we were saying was let's pretend that we never let each other down
We never let each other down

Promise me
