

# Brandy, Warm It Up

Warm it up with love, warm it up with love, warm it up with love

(repeat)

Said we gotta warm this up with love

Only bout a day left till the world falls apart (part)

Wishin we could press restart (start)

Feeling like its time for change whooaa

Gotta be a reason why we loose our minds,

everyones wrong but everyones right.

Tell me why we make it, so complicated

What are we gonna do

Cant let go when I fall

Cant hang up, over call, when we feel so alone

Everyones watching me

And I play when you play, I love when you love, I cry when you cry

Thats the reason why Im turning up this song for freedom

It was up to believe it, cause the whole world is freezing

Need to warm it up with love

Ive got so many reasons for the truth that Im speaking

And the hope we can see, we need to warm it up with love

Warm it up with love, warm it up with love, warm it up with love

(repeat)

Said we got to warm it up with love

Running out of time and the game clock is winding down (down)

Tell me how we turn that ground (ground)

Searching through the lost and found looking for hope

What if we wake and the sun dont shine no more (or)

Everybody locks that door

Tell me why we make it so complicated

What are we gonna do

Cant let go when I fall

Cant hang up, over call, when we feel so alone

Everyones watching me

And I play when you play, I love when you love, I cry when you cry

Thats the reason why Im turning up this song for freedom

It was up to believe it, cause the whole world is freezing

Need to warm it up with love

Ive got so many reasons for the truth that Im speaking

And the hope we can see, we need to warm it up with love

Warm it up with love, warm it up with love, warm it up with love

(repeat)

Said we got to warm it up with love

Its like the pendant is broken

Class act this place im hopin

We make it out alive, downside its looking better

I need some help, I want it, strong enough to do this for me

Theres nobody here but us

And thats why Im turning up this song for freedom

It was up to believe it,

Cause the whole world is freezing

Need to warm it up with love

Ive got so many reasons for the truth that Im speaking

And the hope we can see, we need to warm it up with love

(repeat)

Warm it up with love, warm it up with love, warm it up with love

(repeat)

Said we got to warm it up with love
