Breaking The Silence, Overdose

Some people feel the void inside They try to fill the emptiness With anything in touch or sight They try to ease the pain The void affects everyone But how we respond is up to us I can feel you now like a virus in my veins I want you more and more Jesus you're my overdose People have sex and drink to death And some depend on drugs for peace But nothing else can satisfy I think it's time for change I can feel you now like a virus in my veins I want you more and more Jesus you're my overdose x2 I can feel you now like a virus in my veins I want you more and more Jesus you're my overdose x2 You're my overdose
