

Brevada, To The End Of The World

Our voices quiet, the last sea calm
horizons meet the end
the mountains are warm behind the sun
with seconds of the wind's song

It would break your heart
but in a good way

We searched for a cure but found our fate
We sailed past the sea to the end of the world

We met the stars, they rest on earth
and wait for their time to dance the skies again
at the edge of the land where we are born
The lion waits for childrens songs

He would make your heart sink
but in a good way

We searched for a cure but found our fate
We sailed past the sea to the end of the world
He said his name would change
when we left for home again
but we'd learn his face, we'd learn how to live with him
from the end of the world
