Brian Jonestown Massacre, Stars

I thought i could touch the stars I lie alone at night I don't know where you are my face explodes teardrops into tears and every second I'm not with you well it seems like years.

I've told you how I love you and need you will kill you yeah, yeah

I won't die but I don't feel the same I lie awake at night hoping to see you again my face explodes teardrops into tears and every moment I'm not with you well it seems like years.

I love you I need you yeah, yeah and I told you that I'd kill you yeah, yeah
