

Bring Me The Horizon, Dig It

pins and needles in my face i
can't trust my feelings anymore
shouldn't of looked behind the veil my
whole world's at war
cos they've been feeding us a fable
swallowing the rabbit whole
i cant keep quiet at the table
anymore, no oh

i hate my fucking guts right now
reckon you'd be better if i never existed sorry that i let you down
found a way to hide
and now i'm addicted

give me something to believe in
some kind of system override
i need to give my ghost a reason
to let it slide
cos everyone's too scared to heal
they don't give a fuck how they feel
and i just don't know how to deal anymore
maybe the damage is done
maybe the darkness has won
and we were programmed
just to suffer

i hate my fucking guts right now
i'm sorry that i let you down

i hate my fucking guts right now
reckon you'd be better if i never existed
sorry that i let you down
found a way to hide
and now i'm addicted
cos the world is a scary place
scary future
scary fate
thought the pain
would teach me somehow
but the only thing
i figured out
is life is a grave
and i dig it
and i dig it

i don't wanna lose myself again
i don't wanna lose myself again

cos the world is a scary place
scary humans
scary race
thought the pain
would teach me somehow
but the only thing
i figured out
is life is a grave
and i dig it

cos everyone's too scared to heal
they don't give a fuck how they feel
and i just don't know how to deal anymore
well maybe the damage is done
maybe the darkness has won
and we were programmed

just to suffer

i hate my fucking guts right now
reckon you'd be better if i never existed
i'm sorry that i let you down
when you find this letter
hope you don't get it twisted
cos the world is a scary place
scary future
scary fate
thought the pain
would teach me somehow
but the only thing
i figured out
is life is a
