

Bring Me The Horizon, Parasite Eve

I've got a fever
Don't beliber of nobody
Won't let me leave
Cause i 've seen soemthing
Hope i don't sneez, i don't

Really we just need to fear something
Only pretending to feel something
I know you're dying to run
I want to turn you around

Please remain calm
The end has arrive
We cannot save you
Enjoy the ride
This is the moemnt
You've been waiting for
Don't cal lit a warning
This is a war

It's the parasite eve
Gotta feeling in yout stomach
'cause you know that it's comming for you
O leave your flovers and grieve
Don't forget what they told you
When we forget the infection
Will we remember the lesson
If the suspense doasn't kill you
Something else willl

Move

I heardly they need better signal
Put chip and pins in the needles
Quarantime all of those secrets
In the black
Before you call a brain before it's too lata

Really we just need to fear something
Only pretending to feel something
I know you're dying to run
I want to turn you around

Please remain calm
The end has arrive
We cannot save you
Enjoy the ride
This is the moemnt
You've been waiting for
Don't cal lit a warning
This is a war

It's the parasite eve
Gotta feeling in yout stomach
'cause you know that it's comming for you
O leave your flovers and grieve
Don't forget what they told you
When we forget the infection
Will we remember the lesson
If the suspense doasn't kill you
Something else willl

You can bpard up your windows
You can lock up your doors

But you can't keep washing your hands of this shit any more
Wen all the king's sources
And all the king's friends
Don't know their arses for the pathogens
Wen life is a prison and death is a door
This ain't a warning
This is a war

It's the parasite eve
Gotta feeling in your stomach
'cause you know that it's coming for you
O leave your flowers and grieve
Don't forget what they told you
When we forget the infection
Will we remember the lesson
If the suspense doesn't kill you
Something else will
