

Bring Me The Horizon, wonderful life (ft. Dani Filth)

I read a fun fact about the brain
and how it starts to deteriorate when
we got to 27 or thereabouts

it got me thinking about my head
and what I can do to help stimulate it
make me sad but
I've forgotten what I'm on about

look on the bright side, got keratitis
and you can't sit there
unless you're righteous
I wear a happy face like I'm ed gein
I feel all numb now
is that a feeling?
like a plastic boxed orange with no peel on
I wanna waste /3x
away

along getting high on a Saturday night
I am on the edge of a knife
nobody cares if I am dead or alive
oh what a wonderful life

oh Debbie downer what's your problem?
don't wanna be here
still call shotgun
you got the fomo coursing through my veins
this is not a drill no
this is the real world
domesticated still a little feral
well, don't you know to chew
with your mouth closed?

along getting high on a Saturday night
I am on the edge of a knife
nobody cares if I am dead or alive
oh what a wonderful life
oh what a wonderful life
oh what a wonderful life

I got a Type 2 kinda thirstiness
a far out other worldliness
and one day this might hurt me less

but everybody know I am still down
don't tell me what the butcher does
there's no need for the obvious
so ugly still it's kinda lush
but everyone knows I made vows
left feet on the podium
can't think of an alternate
and hell yoah, I am the awkwardest

but everyone knows I got bounce
