

Britney Spears, Outta This World

There was a time
I used to think
That love would never turn into reality
I never thought
I'd find the one
But I tell I'm drawn to you a strength of none

You must be from heaven, baby, yes you are
Your love is like a shooting star
So they can try but they can't touch (touch)
You gotta look up to us

'Cause your love is outta this world (oooh)
How you bring me down to earth
I love how you put me first
Baby feel my every word

'Cause I'm seeing universes about you
I keep seeing universes about you
There'll always be verses about you
Our love is here to stay
There'll always be a song about you
Forever and a day
There'll always be a song about you

I'll be your moon (moon)
I'll make it bright (bright)
And when it's dark I promise that you'll see the light (light)
And just as far as the moon is from the sun (sun)
That's how long that I'll be here
And it's because

You must be from heaven, baby, yes you are
Your love is like a shooting star (oh no)
So they can try but they can't touch (touch)
You gotta look up to us

Cause your love is outta this world (oooh)
How you bring me down to earth
I love how you put me first
Baby feel my every word

'Cause I'm seeing universes about you
I keep seeing universes about you
There'll always be verses about you
Our love is here to stay
There'll always be a song about you
Forever and a day
There'll always be a song about you

In my sky
We're the stars
I'm on Venus
You're on Mars
People can't understand
How I'm your girl and you're my man, yeah

In my sky
We're the stars
I'm on Venus
You're on Mars
People can't understand
How I'm your girl and you're my man, yeah baby

Cause your love is outta this world (oooh)
How you bring me down to earth
I love how you put me first
Baby feel my every word

'Cause I'm seeing universes about you
I keep seeing universes about you
There'll always be verses about you
Our love is here to stay
There'll always be a song about you
Forever and a day
There'll always be a song about you
