

# Broadway Calls, Get At Me

So get at, get at me  
I've been waiting anticipation it's driving me crazy  
I've been dying all night long  
For this cadence to find a way to my heart  
Pick me back up and drop me back off at the start  
I've been dying all night long  
This only goes so far before we break our hearts  
Reacting, reacting to our loneliness  
Too late, a little too late  
Till we just give in and seal this fate  
Reacting, reacting to our loneliness  
Overreacting  
I get carried away with you  
I wanna smuggle you across daylight  
And break the light and make you all mine  
She never asked me but I promised not to tell  
I never dreamed a night could go so well  
It's so hard to keep this to myself  
Cause I remember everything
