

# Brooks & Dunn, Let's Go West

That burning sunset in the sky's calling out to us tonight  
I won't work for my old man  
Anymore that you fit into your mammas plan  
There's a place for people like you and me  
True love's still got room to breathe

And we can drive all night Into the morning light  
Let's go west  
It's our ticket out of here  
Yeah we can disappear  
Let's go west  
And that painted sky was made for us  
It's everything we ever dreamed of  
Let's go west

It's hard to leave this place behind  
Got memories turning in my mind  
Little white house with a picket fence  
That protected small town innocence  
But it seems like an even trade to me  
That security for our destiny

Yeah we can drive all night  
Till the morning light  
Let's go west

A place that we can go  
Where the tall dreams grow  
Let's go west  
And we'll find a place to call our own  
There's somewhere out there we belong

And that painted sky was made for us  
It's everything we ever dreamed of

Yeah we can drive all night  
Till the morning light  
Let's go west  
A place that we can go  
Where the tall dreams grow  
Let's go west  
And we'll find a place to call our own  
There's somewhere out there we belong

Yeah let's go west  
Oh let's go west  
Oh let's go west  
Yeah let's go west
