

Buckcherry, Without You

Talk to me tonight is everything alright help me understand you

You go out with your friends, talk to other men and our love life is a wasteland

And with the change a new test of faith to help us through tomorrow a condition of the love we made

Cause things won't change without you, forfeit the lies that maimed you I want to dance with the lion

You told me I'm the one and now you're out of love in your eyes it's hard to find you

If we could take some time and cut out all the lies I'd find a heart more stable

[Pre-chorus]

So take it easy girl you're falling through the night, your Mona Lisa eyes will comfort me the rest of

[Chorus]

When love has hit your eyes I'll never say goodbye we stand alone tonight without you, without you
